10. Site description

Please describe the site, providing photos if possible.

- The site is an agricultural field extending to 8.87 hectares surrounded by established hedgerows on the northeastern boundary of the village, with access directly off the public highway.
- The land is gently sloping up to the northwest from 90m – 105m above sea level.

- The site is immediately adjacent and very well related to settlement boundary of Hundon;
- There are numerous access points along Hall Road which could facilitate the site and allow suitable visibility splays;
- The site is located to the north of Hundon – a preferred part of the village due to distance away from the recognised constraints.
- The site is not within nor adjacent to a conservation area;
- The site lies wholly within Flood Zone 1 – whereas parts of the southern part of the village lies within Flood Zone 3.
- Allocation of this site for residential use would not result in a loss of existing green space in the village; and
- Due to the northern position of the site, will result in good access to Bury St Edmunds without the need to go via the village; and
- The development would have very little impact on existing houses and would be and proportionate to the size of the village.

Part two – suitability

Site must comply with policies in the development plan documents which can be found at www.westsuffolk.gov.uk/planningpolicy
